A Subscription Skip will last for one scheduled delivery. After a "skip" is complete, the Subscription will automatically resume its regular shipping schedule. If more skips are required, they will need to be placed individually and only one at a time. For example, if you create a Subscription Skip for October's shipment, you will not be able to create a "skip" for November's shipment until November 1st.

To skip your Subscription, please follow the instructions found [here](#).
