

# products can I take?

Last Modified on 11/17/2020 8:39 am MST

As a beauty and wellness company, Nu Skin cannot provide product recommendations to people with medical conditions or who are taking prescription medications. Such individuals should consult with their physician prior to taking any dietary supplements and/or using any topical products. We recommend taking the product itself and/or any available product information to a physician to decide whether it's appropriate for your specific situation.
